Winds (mph)	S/SE 5-10	S/SE 5-12	S/SE 5-12	E/SE 5-12	E/NE 5-15

**Extended forecast** – Hot temperatures are forecast this week, with heat indices in the upper 90s on Friday before increasing to around 100F for the weekend. Isolated pop-up thunderstorms may develop Friday afternoon before diminishing by sunset. A few models are hinting at the potential for a complex of thunderstorms to develop in northwestern Oklahoma Friday night, but most model guidance suggests this activity dies out before reaching North Texas Saturday morning. Dry conditions are forecast Sunday.

Forecast prepared by meteorologist Joe Halvorson.
